

## Care 2025: Innovate, Orchestrate and Elevate

GCCCF – The Conference 2018  
November 6 · Hamburg, Germany

### Please join us in designing Care 2025.

Improving the quality and ensuring the sustainability of care while increasing efficiencies and balancing costs - this is the challenge we are facing all over the world. **Care 2025** will discuss how to reshape care delivery, leverage digitalization and reduce variations in care.

**Innovate** – By using digital technology and data in a responsible and secure way in order to transform outcomes for patients and citizens.

**Orchestrate** – By creating interoperability between medical devices, information systems and care management solutions to close gaps and deliver integrated workflows.

**Elevate** – By safely harnessing the revolutionary developments in technology to fight inequalities and improve access to services, and ultimately, to raise health and social care delivery to the next level.

Care 2025:  
Conference on **November 6** plus reception for  
all delegates in the evening of **November 5**.
